

The PCNC is a two-axis CNC controller that's used to engrave, cut, drill, 3D shape and laser cut many materials. It comes with a touch screen interface that allows you to operate the machine easily without having to go through the complicated software settings. This is possible because of the PCNC's USB connection which plugs into your computer's USB port and gives you instant access to all the necessary controls. This product also has an extremely generous warranty period of 5 years with free support for life when you purchase it from its official website . The PCNC is made possible through the combination of two different technologies: ProEdge-MX and X-Controller. ProEdge-MX is a program that allows you to design your CNC projects. It offers technical support for all its users, regardless of whether they are beginners or professionals. This is a fully functional system and it's one of the best programs on the market due to its versatility and ease of use. Its basic features include: an advanced shape editor, math functions and commands, 128 points curves and more than 100 commands, each with full documentation on how they can be used. X-Controller is a powerful piece of software that gives you a real-time view of all the actions that your machine takes. This means that you'll be able to view the whole process visually in 3D, which can be very useful when you're dealing with complex shapes or when you want to work on an area where you want to repeat the same process repeatedly. X-Controller is ideal for power users who are serious about creating professional projects. The PCNC has many impressive features and one of its main features is its noise reduction system. This means that it ensures that there are no vibrations in the machine itself, even if it's used in an open workspace. The machine itself is very versatile. It supports the following materials: aluminum, brass, bronze, copper, steel, stainless steel and zinc. It can also be used to engrave most types of plastics (including ABS). This CNC controller comes with a lifetime warranty on all its parts and this means that if anything happens to it during the first 5 years of ownership , you'll get it repaired free of charge.

CNC Expert is a professional CNC Controller program with the most advanced functions for 3-axis CNC control. It can control both 2D toolpaths as well as finished parts in 3D space. This means that you can cut metal, plastic, wood, rubber and ceramics without any problems. It features an automatic tool change system which will greatly increase productivity in your work room. CNC Expert comes with multiple different tools for different tasks. The Exacto allow you to create 2D parts in an easy way due to its easy to use toolpath editor. Its precision milling allows you to cut metal and plastic with great accuracy for all sorts of complicated shapes. The milling machine comes with a big amount of options that can be used in any situation that requires precise cuts.
